

Positive overlap: $\alpha=1$, $\beta=1$; mean angle= 45.22°

q_normalized | central 95% of selected cells

u2_normalized | central 95% of selected cells

Bars: fraction of SELECTED volume (4.917% of full domain). Central bars sum to 95%; each tail holds 2.5%.
Shared x axes, equal-width central bins, linear volume axis. Shading: middle 50% of point values, not a confidence interval.
